Test cases, package causets
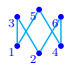

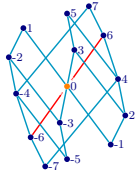

Test cases for typesetting Hasse diagrams with the `causets` package.

1. `\pcauset` test ⁝ in the standard style (with attribute `alt={3-chain}`).

2. `\pcauset` test ◈ in black/white with permutation grid, spatial links (densely dotted), and attribute `alt={N with permutation grid}`.

3. `\rcauset` test ⋈ in neon colours with labels, spatial links, and neon colors.

4. `\causet` test ⧖ in blue colours with labels, an automatically interrupted link (local style: red) crossing the event 0 (local style: orange).
